

Handbook of Modules

**for the Study Program
Master of Arts in
Politics, Administration & International
Relations
(MA PAIR)**

Table of Contents

Master Mandatory Modules (Semester 1 - 2)

Module 23301 Foundation Module	4
Module 23303 Research Design & Methods	5
Module 23302 Advanced Studies in Politics, Administration & International Relations	6
Module 24304 International Law & International Economics	7
Module 24302 Governance	8
Module 24313 Development Administration	10
Module 24314 Comparative Politics & Policy	11
Module 24301 Politics & Society	12
Module 24315 Political Attitudes & Decisions	14
Module 24305 Political Economics	15
Module 24307 Public Finance & Controlling	17
Module 24312 Information Sciences for Administration	18
Modul 24349 Current Issues in PAIR	20
Module 90001 StudentStudy	21
Module 24352 Research Project	22
Module 23350 Master Colloquium	24

Module 23301 Foundation Module				
MA PAIR	Semester 1.	12 Contact Hours	20 ECTS	Contact Time / Self Study (in hrs): 144/356
Teaching Methods		Seminar		
Event Type		Obligatory <input checked="" type="checkbox"/> Elective <input type="checkbox"/>		
Period		1 Semester		
Rotation		yearly <input checked="" type="checkbox"/> per semester <input type="checkbox"/>		
Examinations		Paper Written Exam Presentation		
Scope and Length of Examinations				
Module Responsibility with		Prof. Dr. Eckhard Schröter		
Prerequisites		none		
Use of Module		Mandatory Module MA Foundation Module		
Contents				
The module provides an advanced and comprehensive overview of fundamental issues in the elective subject areas of corporate management & economics, political & social sciences, communication sciences & cultural studies, as well as interdisciplinary approaches.				
Qualification Objectives				
The different elective areas of the foundation module allow students to choose an addition to or advanced studies in their subject knowledge in a way that is ideally suited to the further course of their studies.				
Courses in the Module				
			ECTS	SWS
C 232018	Entrepreneurship		5	3
C 232015	Marketing		5	3
C 233011	Policy, Polity, Politics		5	3
C 233012	Public Administration		5	3
C 231031	Communication Theory		5	3
C 231032	Cultural Theory		5	3
C 223013	Fundamentals of Civil Law Introduction to Public Law		5	3
C 232032	Game & Decision Theory		5	3
C 232014	Theories of Organization		5	3

Module 23303 Research Design & Methods					
MA PAIR	Semester 1-2	6 Contact Hours	10 ECTS	Contact Time / Self Study (hrs): 72/178	
Teaching Methods			Seminar and Exercises		
Event Type			Obligatory <input checked="" type="checkbox"/> Elective <input type="checkbox"/>		
Period			2 Semester		
Rotation			yearly <input checked="" type="checkbox"/> per semester <input type="checkbox"/>		
Examinations			Paper Written Exam Presentation		
Scope and Length of Examinations					
Module Responsibility with			Prof. Dr. Joachim Behnke		
Prerequisites			basic knowledge of mathematics basic knowledge of empirical methods		
Use of Module			Mandatory Module		
<p>Contents</p> <p>The aim of the module is to expand existing basic skills in empirical methods. To do this, on the one hand the scientific theoretical basics of empirical research are discussed, with a special focus on epistemological problems as they can be found in different research approaches and different schools of thought, such as the so-called "quantitative" and "qualitative" research. Throughout the whole sub-module, an integrative viewpoint is adopted, i.e. the point of view that successful research in social sciences requires knowledge and understanding that relate to both research traditions.</p> <p>Qualification Objectives</p> <p>The students get to know the prevailing approaches in the theory of science and in research design, can evaluate them regarding specific research questions, and apply them in their own research. The students understand the different methodological approaches of social research and can apply them to their own research questions.</p>					
Courses in the Module				ECTS	SWS
C 231022 Theory of Science & Research Design				5	3
C 233032 Introduction to Empirical Social Research				5	3
C 123241 through 123244 Advanced Methods (Workshops)				5	3

Module 23302 Advanced Studies in Politics, Administration & International Relations				
MA PAIR	Semester 1-2	12 Contact Hours	20 ECTS	Contact Time / Self Study (hrs): 144/356
Teaching Methods			Seminar	
Event Type			Obligatory <input checked="" type="checkbox"/> Elective <input type="checkbox"/>	
Period			2 Semester	
Rotation			yearly <input checked="" type="checkbox"/> per semester <input type="checkbox"/>	
Examinations			Paper Written Exam Presentation	
Scope and Length of Examinations				
Module Responsibility with			Prof. Dr. Eckhard Schröter	
Prerequisites			basic knowledge of political systems and public institutions	
Use of Module			Mandatory Module	
<p>Contents</p> <p>The module expands existing basic knowledge of the areas of political and administrative sciences, as well as of international relations. In doing this, theories and methods from the following areas are taught:</p> <ul style="list-style-type: none"> political philosophy theories of justice, of liberty, of common welfare, etc. comparison of political systems political decisions global & multi-level governance international organizations international politics public administration public sector management <p>Qualification Objectives</p> <p>After attending the courses in the module the students are able to understand and critically reflect on theories of the areas of political and administrative sciences, as well as of international relations. They are also able to evaluate these theories critically in more advanced courses and to apply them to different spheres of activity.</p>				
Courses in the Module			ECTS	SWS
C 233022 Political Theory			3	5
C 233021 Comparative Politics			3	5
C 233041 Public Management			3	5
C 243022 International Relations			3	5

Module 24304 International Law & International Economics				
MA PAIR	Semester 2-3	6 Contact Hours	10 ECTS	Contact Time / Self Study (hrs): 72/178
Teaching Methods			Seminar	
Event Type			Obligatory <input type="checkbox"/> Elective <input type="checkbox"/>	
Period			1 Semester	
Rotation			yearly <input checked="" type="checkbox"/> per semester <input type="checkbox"/>	
Examinations			Paper Written Exam Presentation	
Scope and Length of Examinations				
Module Responsibility with			Prof. Dr. Joachim Behnke	
Prerequisites				
Use of Module			Elective Module	
<p>Contents</p> <p>The module teaches students the fundamentals of the law of nations and the working methods of international organizations, with a special focus on the legal framework conditions.</p> <p>The sub-module "Economics" focuses on:</p> <ul style="list-style-type: none"> the interaction between politics, economics, and civil society in the age of globalization; governance and control of government action under the condition of international economic interdependency; inter- and transnational trade, monetary, and fiscal policy (tough policies); inter- and transnational labor, social, and environmental policy (soft policies); international regimes and inter- and transnational institutions. <p>Qualification Objectives</p> <p>The students</p> <ul style="list-style-type: none"> know the different sources of the law of nations; get an overview of the legal relationships of the nation states; know the different origins and the relationship between the law of nations and domestic law; get to know the intellectual background of international political economics and are thus able to classify current public and political debates against this background and to critically reflect on them accordingly. <p>The students broaden their understanding of the complex interplay between "evolutionary" and mostly uncontrolled developing structures, governance, and the role of ideas - such as the one of free trade - that leave their mark on reality.</p>				
Courses in the Module			ECTS	SWS
C 243041 Law of Nations			3	5
C 243042 International Political Economics			3	5

Module 24302 Governance					
MA PAIR	Semester 2-3	6 Contact Hours	10 ECTS	Contact Time / Self Study (hrs): 72/178	
Teaching Methods			Seminar		
Event Type			Obligatory <input type="checkbox"/> Elective <input checked="" type="checkbox"/>		
Period			1 Semester		
Rotation			yearly <input checked="" type="checkbox"/> per semester <input type="checkbox"/>		
Examinations			Paper Presentation		
Scope and Length of Examinations					
Module Responsibility with			Prof. Dr. Helmut Willke		
Prerequisites					
Use of Module			Elective Module		
<p>Contents</p> <p>This course provides an overview of the theoretical and conceptual basics for the analysis of organizational structures and decision-making processes in the political-administrative system. The range of the offered explanatory approaches and patterns of interpretation covers the classical, actor-centered, and structuralistic theories, different variations of modern institutional theory, and system theoretical observations of political and social governance.</p> <p>Qualification Objectives</p> <p>The students are enabled a) to analyze and critically compare prevailing explanatory approaches in modern theories of state and of administration, b) to critically reflect on and classify empirical decision-making processes and reform projects against the background of theoretical analytical approaches, c) to reasonably apply the descriptive and prescriptive dimensions of the theories in the context of current international state and administrative reforms. The overall aim is to promote the students' skills in critical analysis, and their ability to communicate both in writing and orally.</p> <p>Main expected outcomes are:</p> <ul style="list-style-type: none"> the ability to summarize even complex texts concisely and to document the respective learning contents; the ability to understand exemplary institutions and working methods of governance, and to present them comprehensibly by means of literature search, discourse, and analysis; the ability to understand, evaluate, and present basic concepts and theoretical components of governance; the ability to adequately and briefly present the practical relevance of the analysis of institutions of global economics and further global functional systems; the ability to formulate and justify smaller development and research projects in the area of global economics /global governance. 					
Courses in the Module				ECTS	SWS

C 243021 Global Governance	3	5
C 243102 European Governance	3	5

Module 24313 Development Administration				
MA PAIR	Semester 2-3	6 Contact Hours	10 ECTS	Contact Hours / Self Study (hrs): 72/178
Teaching Methods			Seminar	
Event Type			Obligatory <input type="checkbox"/> Elective <input checked="" type="checkbox"/>	
Period			1 Semester	
Rotation			yearly <input checked="" type="checkbox"/> per semester <input type="checkbox"/>	
Examinations			Paper Presentation	
Scope and Length of Examinations				
Module Responsibility with			Prof. Dr. Eckhart Schröter	
Prerequisites				
Use of Module			Elective Module	
<p>Contents By critically examining theoretical foundations and empirical evidence of development administration, the course seeks to provide students with an understanding of the process of generating social, economic, and political change in developing countries and transitional economies.</p> <p>Qualification Objectives The class is geared to the theoretical and empirical examination of how policy, program, and community-level intervention can be employed to promote 'good governance' and to address economic, political, and managerial development challenges.</p>				
Courses in the Module			ECTS	SWS
C 243131 Political Economy of Development Administration			3	5
C 243132 Managing Public Services in Developing Countries			3	5

Module 24314 Comparative Politics & Policy				
MA PAIR	Semester 2-3	6 Contact Hours	10 ECTS	Contact Time / Self Study (hrs): 72/178
Teaching Methods			Seminar	
Event Type			Obligatory <input type="checkbox"/> Elective <input checked="" type="checkbox"/>	
Period			1 Semester	
Rotation			yearly <input checked="" type="checkbox"/> per semester <input type="checkbox"/>	
Examinations			Paper Presentation	
Scope and Length of Examinations				
Module Responsibility with			Prof. Dr. Eckhart Schröter	
Prerequisites				
Use of Module			Elective Module	
<p>Contents</p> <p>The module specializes on political and administrative comparisons and covers both the institutional and the actor-centered dimensions of social and political power structures (polity and politics dimensions), as well as the policy dimension of the contents of political programs (policy analysis). In its overall perspective the module thus provides a comprehensive overview of the main governance models in a European and non-European, as well as international comparison.</p> <p>Qualification Objectives</p> <p>Thus, the students are enabled to analyze and evaluate converging and diverging developments of governance systems. They can critically evaluate policy transfers and the diffusion of political solutions in their scope, and can analyze them on a sound methodological basis.</p>				
Courses in the Module			ECTS	SWS
C 243141 Political Institutions			3	5
C 243111 Policy Analysis			3	5

Module 24301 Politics & Society

Scope and Length of Examinations				
Module Responsibility with			Prof. Dr. Joachim Behnke Prof. Dr. Helmut Wilke	
Prerequisites				
Use of Module			Elective Module	
<p>Contents</p> <p>The students receive an introduction to the theory of social systems as a sociological system theory. The focus of the course is on the explanation and discussion of basic paradigms, concepts, models, and terms of modern sociological system theory. In a first part, the focus is on the terms of communication, complexity, and contingency.</p> <p>A second focus is on the development of a basic understanding of the strengths and weaknesses of systemic thought. This is supported by an elementary comparison of theories, especially including the theory of action and phenomenology. The comparison of theories becomes more concrete by using the practical problem of system control.</p> <p>A third focus addresses the topic of the political system of modern societies. This is on the one hand the connection to classes on political theory, on the other hand the political system serves as a pars pro toto of an autonomous, differentiated functional system of society. Functional differentiation as a central structural model of modern societies is exemplified using the way the political system works.</p> <p>Qualification Objectives</p> <p>The students gain:</p> <ul style="list-style-type: none"> the ability to critically analyze and evaluate theoretical texts; the ability to concisely summarize even complex texts, to document respective learning contents, as well as the ability to understand exemplary aspects of systemic thought and to present them comprehensibly by means of literature search, discourse, and analysis; the ability to understand, evaluate, and present basic terms and architectonic decisions of the theory of social systems, as well as the ability to briefly present the practical relevance of systemic thought for professions of system control. <p>The students gain in-depth knowledge of the following topics:</p> <ul style="list-style-type: none"> network theories (sociological) expansions: socio-economic network theories 				

economic network theories more recent policy networks: concepts and assessments concepts of social capital theories of parties		
Courses in the Module	ECTS	SWS

Examinations			Presentation Paper		
Scope and Length of Examinations					
Module Responsibility with			Prof. Dr. Jörn von Lucke		
Prerequisites			basic knowledge of information sciences for administration		
Use of Module			Elective Module		
<p>Contents</p> <p>The former disciplinary borderline between business, politics, administration, and culture is disappearing more and more, and interdisciplinarity is increasingly gaining in importance. Information and communication technologies as drivers of these changes are more and more relevant in management-oriented political and administrative sciences. This module teaches the students advanced knowledge of information sciences for administration and of business informatics, using selected areas where modern information and communication technologies are used in the public sector.</p> <p>This module is to expand already existing knowledge and to strengthen the understanding of new technologies. The aim is to teach the students the relevance and the possibilities of the application of information technologies for the modernization, organization, and processes of administration.</p> <p>Qualification Objectives</p> <p>The students gain insight into the current concepts, models, and tools of information sciences for administration, and learn the possibilities of their application in politics and administration. Thus they are to become able to prepare and make strategic decisions on the introduction of new technologies. The programming of computers and networks is not part of the module.</p>

<p>Contents The aim of the module - usually covering two semesters - is to offer current issues that are not integrated into the curriculum as part of the electives in the major phase. The students are involved in the organization of this course. The module is thus a framework for the designing of the course, its contents, qualification objectives, formats, lecturers, and assignments which are agreed upon and organized together with the executive program director.</p> <p>Qualification Objectives The students learn to design and organize courses according to their own ideas and to take on responsibility for this process.</p>

Period			1-2 Semester	
Rotation			yearly <input type="checkbox"/> per semester <input type="checkbox"/>	
Examinations			<p>Academic report on the research project as an academic paper (15 ECTS - ZU-grading scale according to GSPO-BA)</p> <p>Participation in a research colloquium and interim report on the research project (5 ECTS – grade of the examination "pass - fail")</p> <p>Written exam [C 113511] (10 ECTS - ZU-grading scale according to GSPO-BA)</p>	
Scope and Length of Examinations				
Module Responsibility with				
Prerequisites			<p> Application for a research project of a ZU chair, research cluster, research association, or research center.</p> <p> The concrete subject-specific pre-requisites result from the respective topics.</p>	
Use of Module			Elective Module PAIR	
<p>Content</p> <p>The module "Research Project" addresses students with a pronounced interest in academic work and research-oriented professional fields. It offers students the chance to realize – academically supported – a research-oriented project at a ZU chair, a research cluster, research association, or research center. In the course of their project the students write an academic paper as a report on their project. This written examination is an independently prepared academic work in which students apply academic methods and findings to a concrete research topic. A ZU professor supervises this project and agrees to the research question and the applied methods. The results are put down in writing and submitted together with the registration for the Humboldt Year. Project progress, potential problems in working on the project, and possible solutions are discussed in the related research colloquium. The contents and methods required to work on the project are taught in the context of a seminar.</p>				

Qualification Objectives

This module trains the students in independent work and teaches advanced knowledge in scientific working. The students learn to deal with a topic on an academic level over a whole year.
