## Zeppelin Year

Module 10000   Interdisciplinary Module   Zeppelin Project				
BA	Semester 1-2	7 Contact Hours	14 ECTS	Contact Time / Self Study (in hrs): 63/287
Teaching Methods		Lecture, Workshop, Group Coaching		
Event Type		Obligatory <input checked="" type="checkbox"/> Elective <input type="checkbox"/>		
Period		2 Semesters		
Rotation		yearly <input type="checkbox"/> per semester <input checked="" type="checkbox"/>		
Examinations		Paper, Presentation, Group Research Project / Report		
Module Responsibility with		Chair of Sociological Theory ZEPPELIN Chair of International Economics		
Prerequisites		None		
Use of Module		Mandatory Module BA Zeppelin Year		
<p><b>Contents</b></p> <p>The objective of the training research project is the independent work on study-relevant Contents and the ability to carry out academic work: The students are to develop the competence to observe a current social problem area in such a way as to be able to develop question areas they can work on, to access expert knowledge from various disciplines to address these questions, and to apply methods of data collection and evaluation. The results are presented in a final conference open to the whole university. The training research project is supplemented by an interdisciplinary seminar, courses on methods, and a seminar on project management so that the students can acquire the knowledge necessary for the research project, and academic work is learned by studying a concrete topic, while being supported by an academic supervisor.</p> <p><b>Qualification Objectives</b></p> <p>The students are enabled to work on academic questions in a project format by accessing and using expert knowledge from various disciplines. They learn independent academic work in the context of a research project that is carried out in small groups over a period of two semesters. The focus is on defining and monitoring the processes of cooperation and coordination within a project team.</p> <p>By making them familiar with the theories and tools of project management they become able to set up a project independently. Additionally, in the context of the project implementation it is essential that the students test the practicability of the knowledge they have gained in reality – by negotiating with external project partners such as cultural institutions, corporations, and academic experts.</p>				

Courses in the Module	ECTS	SWS
C 100006 – Professional Perspectives	4	3
C 100007 – Methods Workshop I	1	1,5
C 100007 – Methods Workshop II	1	1,5
C 100008 – Project work in groups	8	1

<b>Module 10001   Interdisciplinary Module   Introduction to Science</b>				
BA	Semester 1	5 Contact Hours	4 ECTS	Contact Time / Self Study (in hrs): 45/55
Teaching Methods			Lecture, Seminar	
Event Type			Obligatory <input checked="" type="checkbox"/> Elective <input type="checkbox"/>	
Period			1 Semester	
Rotation			yearly <input type="checkbox"/> per semester <input checked="" type="checkbox"/>	
Examinations			Exam (90 min), Paper	
Scope and Length of Examinations				
Module Responsibility with			Chair of Political Science Chair of Socioeconomics Chair of Media & Communication Science	
Prerequisites			None	
Use of Module			Mandatory Module in Semester 1	
<b>Contents</b>				
<p>The module deals with fundamental problems in the philosophy of science. Central concepts, theories and controversies in economics and the social and cultural sciences dealing with the topic of philosophy of science are discussed. Especially important is the focus on the topic of interdisciplinary research. Last not least the foundations of scientific work are imparted.</p> <p>Possible subjects are:</p> <ul style="list-style-type: none"> <li>  What is this thing called science?</li> <li>  Theories, methods and hypotheses</li> <li>  Concepts of interdisciplinary research</li> <li>  Weber's program of the doctrine of science</li> <li>  Popper's Critical Rationalism</li> <li>  Kuhn's theory of paradigm shift</li> <li>  Lakatos' Research program</li> <li>  Feyerabend's methodic pluralism</li> <li>  Lyotard and postmodern knowledge</li> <li>  Science and scientific theories as social constructs</li> </ul>				
<b>Qualifications Objectives</b>				
<p>In the seminar students will achieve knowledge about several foundational concepts of the philosophy of science and the theory of knowledge. They will acquire skills to critically relate these concepts to each other. Also they will learn to evaluate scientific methods against the background of developments in the philosophy of science and current challenges.</p>

Prerequisites		None		
Use of Module		Mandatory Module in Semester 1 and 2		
<p><b>Contents</b></p> <p>The course Empirical Social Research introduces methodological terms, research designs, sampling procedures and measurement. Qualitative interviews and surveys, observational studies and Contents analysis will be covered. Practical aspects as questionnaire design or problems of data collection like reactivity will be also addressed.</p> <p>The course Statistics covers basic principles of probability theory, descriptive and inference statistics. Starting with univariate descriptions, bivariate analyses, measures of association and tests for variables with different scale levels will be introduced stepwise.</p> <p><b>Qualifications Objectives</b></p> <p>The goal of the module is to illustrate the research process starting with the theoretical foundations and the necessary planning steps as well as the data collection and analysis. Furthermore, the students will be sensitized to a reasonable usage of statistics and they will gain an overview over descriptive and inductive statistics.</p> <p><b>Literature</b></p> <ul style="list-style-type: none"> <li>  Diekmann, Andreas (2010): Empirische Sozialforschung. <b>Module 11312   Political Sociology &amp; Empirical Policy Research</b>				
BA	Semester 3-4	6 Contact Hours	12 ECTS	Contact Time / Self Study (in hrs): 54/246
Teaching Methods			Seminar, Tutorial	
Event Type			Obligatory <input checked="" type="checkbox"/> Elective <input type="checkbox"/>	
Period			2 Semesters	
Rotation			yearly <input type="checkbox"/> per semester <input checked="" type="checkbox"/>	
Examinations				
Scope and Length of Examinations				
Module Responsibility with			Chair of Political Sociology	
Prerequisites			Successful Completion of the module „Empirical Social Research“	
Use of Module			Mandatory Module in Semester 3 and 4	
<b>Contents</b>				
<p>This module introduces into those topics in political science that focus on the intersections and interrelations between politics and society. It also gives the opportunity to engage with these topics in the practical analysis of empirical data. The module is concerned with questions such as: What kind of attitudes contribute to the stability of democracy? Why do citizens turn out to or abstain from elections? When do they prefer other, non-electoral forms of political participation? What are the main motives and factors in the voting decision? How do young people grow up into democratic politics? How stable and informed are citizens' political opinions?</p> <p>Topics of this module are:</p> <ul style="list-style-type: none"> <li>  Political culture</li> <li>  Political parties and organized interests</li> <li>  Politische participation</li> <li>  Electoral behavior</li> <li>  Political socialisation</li> <li>  Formation of political attitudes and opinions</li> </ul>				
<b>Qualification objectives</b>				
<p>With successfully completing the module, students understand the most important theoretical approaches of political sociology as well as the main methods of empirical research in this area. They have gained their first experiences in engaging with research literature and with conducting analyses of empirical data.</p>				
<b>Literature</b>

Module Responsibility with		Chair of Global Governance Chair of International Relations		
Prerequisites				
Use of Module		Track: International Relations		
<b>Contents</b>				
<p>The seminar provides an overview of the historical development of the theoretical and empirical studies in International Political Economy (IPE). In doing so, this module teaches IPE as a scientific discipline, its central theoretical approaches and evaluates the strengths and weaknesses the theories have. Moreover, different actors and fields of IPE will be analyzed, such as the role of the state, financial markets or trade relations. In addition, the module deals with power relations in the global political economy and thereby the internal and external development dynamics of different countries.</p>				
<b>Qualifications Objectives</b>				
<p>After attending the seminar, participants should have gained a sound insight into international political economy. They should be able to develop empirical questions and answer them based on theories in IPE.</p>

Module Responsibility with		Chair of Public Law, Tax & European Law & Regulatory Law		
Prerequisites				
Use of Module		Track: International Relations		
<p><b>Contents</b></p> <p>According to which rules do nation states cooperate on an international level? What systems of governance exist alongside the national or European legal system? And what rights can be derived from them for individuals at the international level? These are only three questions, but they are intended to outline the outstanding role of international law. International Law is the legal link between states, institutions and private individuals. The course "International Law" conveys the basics of this comprehensive field of law. The focus will be on the following topics in specific:</p> <ul style="list-style-type: none"> <li>  Legal basis of international law</li> <li>  subjects of international law (including states, international organizations, individuals)</li> <li>  Principles of diplomatic protection</li> <li>  Sovereignty, state immunity and responsibility</li> <li>  Human rights and international humanitarian law.</li> </ul> <p><b>Qualifications Objectives</b></p> <p>The students</p> <ul style="list-style-type: none"> <li>  know legal sources and basic concepts of international law; they are able to apply them in practical cases.</li> <li>  are familiar with the structure and organization of the UN and are able to assess its possibilities for action as well as those of its staff.</li> <li>  know the instruments of international human rights protection and can assess their significance for the international community and the international legal order.</li> <li>  can discuss current issues of international law and place them in the general discourse on international law.</li> <li>  can assess the extent to which international law is a tool in the fields of international relations, development policy and security assurance.</li> </ul>

<p><b>Contents</b></p> <p>This course offers an introduction to the functioning of international organizations and their role in world politics. Building on the module “International Relations”, it provides an overview of the main explanatory approaches to the establishment and influence of international organizations in different policy fields. This includes questions about the autonomy and authority of international organizations, the challenges for reform and change, as well as politicization and protest. Moreover, the module focuses on the relations of international organizations with states, civil society actors, and other international organizations.</p> <p><b>Qualification Objectives</b></p> <p>Upon successful completion of the course, students</p> <ul style="list-style-type: none"> <li>  understand the central explanatory approaches for the establishment, behaviour and influence of international organizations,</li> <li>  can apply these to international organizations in different policy fields,</li> <li>  are able to critically examine normative questions concerning the power and legitimacy of international organizations.</li> </ul> <p><b>Literature</b></p> <ul style="list-style-type: none"> <li>  Hurd, Ian 2018. <p><b>Contents</b></p> <p>The module introduces the key principles underlying the European legal order as well important governance arrangements within different policy sectors. The main question is how EU law is created, implemented, and enforced. Which political conflicts dominate these processes? Which role do EU institutions play in this context? And how important are member states' public administrations and courts in this regard? On this basis, the module discusses the problem-solving capacity of the EU's system of multilevel governance.</p> <p><b>Qualification Objectives</b></p> <p>Students learn key principles of EU law as well as core aspects of governance arrangements within different policy areas within the EU's multilevel system. Moreover, students develop the ability to identify important hurdles to EU decision-making as well as sources of implementations and enforcement problems. Finally, students are able to critically reflect on the problem-solving capacity of the EU's multilevel system.</p> <p><b>Literature</b></p> <ul style="list-style-type: none"> <li>  Cini, M. and N. Use of Module		Track: Political Behavior & Institutions		
<p><b>Contents</b></p> <p>Game theory is used in almost all disciplines of the social sciences for the analysis of so-called strategic decisions. Making these decisions by choosing one specific option of action the actor is considering the expected actions of the other „players“. Classic applications of game theory can be found in the political sciences in the areas of international politics (arms race and deterrence), electoral research and theories of the social contract. In the module the most important concepts of game theory like the cardinal utility concept, equilibria, the minmax-theorem etc. are explained and discussed, possibly in relation to the problem of analysis, for which the concept can be regarded as a fruitful tool or the appropriate solution.</p> <p><b>Qualification objectives</b></p> <p>After successfully finishing the module, students will</p> <ul style="list-style-type: none"> <li>  know a variety of „games“ in the game-theoretical meaning,</li> <li>  be able to identify the specific type of a game and to apply it to the analysis of problems</li> <li>  be able to develop simple game theoretic models of their own for the analysis of problems of strategic decisions</li> </ul> <p><b>Literature</b></p> <ul style="list-style-type: none"> <li>  Behnke, Joachim (2020), Entscheidungs- und Spieltheorie. <p><b>Contents</b></p> <p>The seminar aims on the teaching of investigation of political decisions and institutions with analytical methods. In this view institutions help actors - like citizens, politicians and parties - to coordinate their individual actions and to overcome obstacles to mutual cooperation. According to this approach institutions can be seen as constraints in regard to which the actors have to choose their optimal option of action. The seminar deals among other things with the following topics:</p> <ul style="list-style-type: none"> <li>  Problems of collective action</li> <li>  Decision rules for groups</li> <li>  Elections and electoral systems</li> <li>  Parties and competition</li> <li>  Interest groups</li> <li>  The making of coalitions in multiparty-systems</li> <li>  The process of legislation</li> <li>  Administrative action</li> <li>  Supreme courts and judicial</li> <li>  International conflict and international cooperation</li> </ul> <p><b>Qualification Objectives</b></p> <p>Students</p> <ul style="list-style-type: none"> <li>  gain knowledge of several approaches to the explanation of political phenomena</li> <li>  learn to critically evaluate the heuristic value of theoretical models.</li> </ul> <p><b>Literature</b></p> <ul style="list-style-type: none"> <li>  Kenneth A. Scope and Length of Examinations				
Module Responsibility with		Chair of Social & Economic Psychology LEIZ Chair of Economic Psychology and Leadership Ethics		
Prerequisites				
Use of Module		Track: Political Behavior & Institutions		
<b>Contents</b>				
<p>This course offers an introduction to the psychology of judgment and decision making. Prominent theories that describe how people make decisions, various factors that can influence those decisions, and shortcuts that can bias the results will be discussed. Integrating theory and empirical research, the course will introduce students to the fundamentals of decision making with a focus on information search, information usage, and effects of feedback on decision making. This course is tailored for students in economics, political, and social sciences. Judgment and decision making is an interdisciplinary research field; hence, studies from psychology, economics, and behavioural ethics constitute the literature basis.</p>				
<b>Qualifications Objectives</b>				
<p>Students will get to know current empirical research on judgment and decision making. They will gain a better understanding of the limits of rationality in human decision making, i.e., the concept of bounded rationality. The course will show when and why individuals are subject to biases and how these biases can be influenced or hindered. In this lecture, students will gain insight into classical decision theories and current empirical research.</p>

<b>Contents</b>				
<p>In this course, participants will gain insight into scientific findings on the effects of HR management on the experience and behavior of people in organizations. Particular attention is paid to the requirements and framework conditions in public sector organizations. Important topics include the basis of central theories of HR management, the introduction to fundamental approaches of HR management (e.g. personnel selection, marketing, development) and the transfer of knowledge concerning the influences of leadership (especially through different incentive systems) on an organizational and individual level. This gives students an insight into the basic models and instruments of personnel management in the private and public sectors and practice their application in hands-on case work.</p>				
<b>Qualification Objectives</b>				
<p>After successful completion of the course, students will be familiar with essential theories, models and tools of HR management and be able to apply them in practice. They should be able to recognize problems in the field of HR management and independently develop appropriate solutions.</p>

<p><b>Contents</b></p> <p>From climate change, old age poverty, the obesity epidemic, all the way to health and educational inequality: governments around the world are faced with highly complex societal problems. This module deals with the question about which instruments governments use to address these problems. Do they turn to incentives, prohibitions, rules, or the provision of information? Why do different governments turn to different policies? What are the impacts of these policies? And under which conditions is policy change possible? These questions will be addressed within different policy contexts including social policy, education policy, environmental policy, morality policy, and public health policy. In addition to theoretical models of policy change, the module discusses empirical developments and current reform proposals in various countries.</p> <p><b>Qualification Objectives</b></p> <p>Students become familiar with key problems within different policy sectors. Additionally, students get to know different policy approaches addressing these problems. Moreover, students learn to discuss and compare different theoretical models and frameworks of policy change. Finally, develop the ability to critically reflect different approaches to assess policy impacts.</p> <p><b>Literature</b></p> <ul style="list-style-type: none"> <li>  Cairney, P. (2020). <p><b>Contents and Qualification Objectives</b></p> <p>The course is the introduction to public sector informatics. It focuses on Electronic Government and the application-oriented use of modern information and communication technologies in political boards and administration to the fulfilment of public tasks. The number of tools and system solutions under consideration opens up a wide range of possible applications, from which particularly relevant approaches can be prepared in exemplary fashion and discussed together. The students receive an insight into essential concepts, models and tools of public sector informatics, get known to the application spectrum in governmental agencies, offices and public enterprises and should be enabled to get used to the work in the future independently with new technologies foreseeable not yet. Public sector informatics and electronic government as well as the e-government players in the Federal Republic of Germany are covered. Secure documents and secure communication are further focal points. Open government, transparency, citizen participation and cooperation have to be additional topics. One Stop Government and portals for public administration will complete the range of subjects. Finally, the use of information and communication technologies in the administration of public order, the financial administration, the judiciary and the health administration will be analyzed and reflected upon.</p> <p><b>Literature</b></p> <ul style="list-style-type: none"> <li>  Heuermann, Roland; Tomenendal, Matthias und Bressemer, Christian (Hrsg.): Digitalisierung in Bund, Ländern und Gemeinden - IT-Organisation, Management und Empfehlungen, Springer Gabler, Wiesbaden 2018.</li> <li>  von Lucke, Jörn: Regieren und Verwalten im Informationszeitalter, Schriftenreihe der Hochschule Speyer, Band 156, Berlin 2003.</li> <li>  Seckelmann, Margrit (Hrsg.): Digitalisierte Verwaltung - Vernetztes E-Government, 2. Prerequisites		Basics in PAIR	
Use of Module		Track: Public Management, Public Policy & Digitalisation	
<b>Contents</b>			
<p>In this course, current topics, trends and technical developments are explored in depth. The teaching format consists of specialist introductions by the lecturers, discussions of topic-related accompanying reading and the practical application of selected methods. Project and group work may also be used for this purpose. This module is primarily intended to further deepen the students' existing knowledge. In view of current developments and the individual lecturers, the thematic focus shifts from year to year.</p>			
<b>Qualifications Objectives</b>			
<p>The course deals in depth with current topics in public management, public policy and the digitalisation of the state and administration. The students gain insight into current topics, new concepts, models and tools, learn about possible applications and are enabled to independently deal with current developments. External guests are invited as valuable sources of inspiration.</p>

Use of Module				
<p><b>Contents</b></p> <p>The module "Research Project" offers the students the possibility to realize – academically supported – their own project in which they work on a research question. As part of the project the students write a paper as a project report. This written examination is an independently prepared academic work in which students apply academic methods and findings to a concrete research topic they have developed on their own, and to potential practical problems. A ZU professor supervises this project and agrees to the research question and the applied methods. The results are put down in writing and submitted together with the registration for the Humboldt Year.</p> <p>The contents and methods required to work on the project are taught in two appropriate courses on methods. A research design seminar must be attended as well to increase the students' skill in independent academic work.</p> <p><b>Qualification Objectives</b></p> <p>The students</p> <ul style="list-style-type: none"> <li>  gain the skill to plan and implement academic projects and to put them into writing as an academic paper;</li> <li>  can successfully apply the theoretical competences gained in their program of studies to practice-oriented questions;</li> <li>  are enabled to work on problems from their professional fields using academic methods.</li> </ul>

<p><b>Contents</b></p> <p>The module focuses on the question of how the new and different comes into the world and how one gains unfamiliar perspectives on the familiar. Students are encouraged to experiment and perform with the possibilities of aesthetic and artistic forms of knowledge and to become creatively active. They learn observation, improvisation and imagination techniques and become familiar with forms of world appropriation that derive from practical, creative action and unfold in the work with their own bodies and senses.</p> <p>Within the module, different focal points are offered and combined with each other. These range from performative forms of presentation and filmic work, photography and drawing, design to ritual self-techniques of yoga. Practical workshop blocks and a public final presentation structure the program. Students interested in a more intensive exploration of the above topics should take Module 121403 "Creative Performance," which is elective for CCM students and multidisciplinary for students in other programs.</p> <p><b>Qualification Objectives</b></p> <p>The module aims at sharpening perception and imparts knowledge of alternative forms of knowledge and creativity techniques in the context of university education. Students receive a practical introduction to creative competencies and a sense of the social situatedness of their actions.</p>

<p><b>Content</b></p> <p>The fundamentals of entrepreneurship form a prominent research focus at ZU, especially in the field of social entrepreneurship. Corresponding (student) projects are sustainably supported. The workshop on multi-value entrepreneurship familiarizes students with the background, questions, risks and potentials of start-up. Closely oriented to the chronology of the start-up project, it provides an overview of the necessary steps for planning new business ideas and discusses the theories and concepts of entrepreneurship.</p> <p><b>Qualification Objectives</b></p> <p>Upon completion of the workshop, students will possess techniques and tools to independently identify and assess a marketable innovation potential and to plan, finance and successfully market their own business ideas.</p>
