

# Hygiene Guidelines to protect Corona Virus

For infected persons and persons suspected of being infected, the access and participation ban applies

The right-hand traffic rule applies throughout the building; follow one-way traffic regulations

**3G rules are valid (vaccinated, recovered, tested)**

The measures to contain the coronavirus in Germany have been eased, but a number of special safety measures apply. The 3G rule (short for German "geimpft, getestet, genesen – vaccinated, tested, recovered") is used to define low-risk groups in epidemiological terms.

Wash hands regularly, use disinfection stations as needed

Registration and data entry for non-ZU-members at Check-in

If necessary, perform wipe disinfection of the workplace surfaces

**Check-in via Luca App**

Luca is an app for contact tracking by the public health department (for Android, iOS and as a web app). Simply download it, enter your contact details – and you're done: [luca-app.de](https://luca-app.de)

Regular ventilation of the work and seminar rooms

**Mandatory wearing of a medical mouth-nose covering in the entire building as well as in the outdoor area if the distance is less than the minimum distance**

Remove used dishes

Keep a minimum distance of 1.5 meters indoors and outdoors

Coughing and sneezing into the elbow for not exposing the hands with bacteria
